

*Speculum perspicuum Vganicum:*

Or, AN

# ALMANACK

For the

Year of CHRIST, 1674.

Being the second after *Bissextile*, or Leap Year;  
And from the Creation of the World, 5623 years.

Since the Death of our Saviour 1641 years.

Since the Conquest of *William* Duke of Nor-  
mandy, 608½ years.

Since the Flood of *Noah* 3967 years.

Since *LONDON* was Built, 2781 years.

Since the Restauration of K. *Charles II.* 14 years.

Since *London* was Burned, 8 years:

Wherein is contained

A true Description of the Year, and of the seve-  
ral parts thereof, according to the *English* and Forreign  
Account, with necessary Tables and Observations of  
worth, with a just account of such Eclipses as will hap-  
pen this year.

Calculated

For the Meridian of the Ancient and famous City  
of *London*, whose Latitude is 51 Degrees, and 32 mi-  
nutes, and may serve without sensible error for any  
part of *England*.

Collected and published by

LANCELOT COELSON,

Student in Physick and Astrology.

*Some*

*Some Brief Rules to be observed in the true ordering the Body in Purging and bleeding, and the Astrological time when most Convenient.*

IN several Causes of the indisposition of the Body, where Purging and Vomiting is necessary, there is first to be considered a true preparing of the Body before the Administration of Medicine, therefore called a *Preparative*; and this is that which *Hypocrates* doth Counsel in the first *Aphorism* of his second Book, where he saith, *Corpora cum quisque purgare voluerit, oportet parva facere.*

There is also good heed to be taken what Sign the Moon is in when any Purgation is Administred.

Good to	prepare Humors.	The Moon in	Gemini, Libra, Aquar.
	Vomit.		Aries, Taurus, Capric.
	Purge by sneezing.		Cancer, Leo, Virgo.
	take Glisters.		Aries, Libra, Scorpio.
	use Gargarisms.		Cancer or Aries.
	stop Rheums and Fluxes.		Taurus, Virgo, Capric.
	Bath for cold diseases.		Aries, Leo or Sagitt.
	Bath for hot diseases.		Cancer, Scorpio or Pif.
Purge with	Eleuari.	The Moon in	Cancer.
	Potions.		Scorpio.
	Pills.		Pisces.

A Purgation ought also to be taken warm, for so it offends the Stomack least, and will work the sooner and better: such as are apt to vomit may smell to a roast of Brown bread dipped in Vinegar, this is as to potions, and am confin'd.

To hasten to the use of time and benefit of blood-letting or Phlebotomy, as to its use 'tis sufficiently known and the benefit that ariseth thereby is also well known in causes of a plurisy and squinsy and many other distempers occasioned by the quantity or quality of the blood, and therefore the time most convenient shall be our task.

The time of the year must be considered, that it may not be too hot nor too cold, therefore the spring time is the best, by reason that is a temperate season.

The vehemency of the Disease must be considered, let the time and weather be what it will it must not then be delayed, but then the common Proverb is, *Necessitas non habet Legem*.

The sign the Moon is in, ought to be observed, that she be not in a sign that governeth the member wherein the vein must be opened.

For the Completion let blood

The	{	Phlegmatick.	{	The	{	Aries or Sagittarius	
		Melancholick.				Moon	Libra or Aquarius
		Cholerick				being	Cancer or Tisces
		Sanguine.				in	in either of these.

Let not blood the Moon in *Taurus, Gemini, Leo, Virgo* or *Capricorn*, the day before nor after the Change or Full of the Moon, twelve hours before and after the Quartils, the Moon with *Jupiter* or *Mars* evil aspected.

For the time of the day, the morning fasting or in the afternoon, after perfect digestion, the air temperate, the wind not at South; I have not time nor paper allowed to enlarge further at this time.

To

Coelson, 1674.

To the Right Worshipful Sir *WILLIAM WARREN* Kt. in the Hamlet of *Wapping* in the County of *Middlesex*.

Honored Sir,

I Hope your Worship will easily pardon this my bold Adventure, to affix your Worthy Name to so mean a piece of service, which is only the production of some few weeks Study and Recreation; It was long since designed even before that late sad accident of Fire which prov'd so prejudicial unto you, and by which you became so great a sufferer.

Sir, if you will be pleased to cast a favourable Aspect upon so Inconsiderable a mite, it will animate me to present the World with something (if God spare life) that may be much more serviceable, and I hope I shall endeavour (if this be not reputed a crime in me) for the future in some measure to merit your Patronage and Protection----. In the mean time and for ever, that God may bless your Worship and Virtuous Lady, together with your whole Family with health and prosperity in this world, and eternal fruition in the next, is the real desires and prayers of,

From my House at  
the Royal Oak in the  
Still - Yard upon  
Great Tower Hill  
near the ~~Gun~~-Tavern  
July the 28 1673.

Honorable Sir,

Him which is your  
affectionate

Friend and Servant

*Lancelot Coelson.*

# MARCH, 1674.

March enters like a Lamb, and so beguiles  
Our easie Hopes with a few Treacherous smiles,  
Titan Cajoles stern Mars, and by his Charms  
Court's leaden Saturn to his Golden Arms :  
Whilst Mavors with a frown doth Jove behold,  
Which makes the Air Turbulent and Cold.

# APRIL, 1674.

*Whilst Heaven down its choicest blessings pours,  
Suckling the Infant Spring with gentle showers;  
The Queen of Love with fumbling Saturn's plac'd,  
And by a square from jealous Jove disgrac'd.  
Some Ladies mourn: But still a womans eye,  
Is April-dust, no sooner wet but dry.*

May 1674.

Month days.  
Week days.

Fresh Gales through leafy Periwigs of Trees,  
Fanne purer Air to with a gentle Breeze,  
And Nature (like nice Ladies) seems afraid,  
Of foul Weather now she's so fine Arraid.  
But pride is still short liv'd, the Starry Train  
Threatens to dash the end o'ch Month with Rain

# June 1674.

Fine temperate Air, for each Planet Combines  
 To dart no Aspects, but Sextiles and Trines.  
 If those superiour Bodies thus agree,  
 Oh why fond peevish mortals cannot we,  
 But hold, I ken afar some squares perhaps,  
 May rouse us up with roaring Thunderclaps.

August 1674.

Fair Cynthia vex with Saturn, Mars and Jove.  
The Weather needs must hot and sultry prove:  
Yet welcome since our Harvest it befriends,  
And makes Laborious Husbandmen amends.  
The Carter brings all home with whistling voice.  
He Plow'd with pain, and reaping does rejoyce.

# September 1674.

See! how the Clowds, thole Boates at the Sea,  
Toit by the lporting Winds abroad do flie.  
Till sin ling love displays his am'rous Face,  
And greer fair Venus with a kind Embrace.  
Ac wh ch her Galant, furious Mars do's storm.  
But Husband, freet ings seldom Wives Ret. rm.

# October 1674.

A blustering month! Sa urn oppoles Sol;  
 Any Mars both Jove, and Scilbon do h Contreul,  
 To scape the fury of such dire positions,  
 Lock up to God, who grants Stars their Commission;  
 For daily we mans proud Grandeur find,  
 Scatter'd like Leaves of Autumn by the Wind.

November 1674.

The Weather's most part cold, cloudy, and close;  
For angry Mars do's fainting Sol oppose.

And spightful Saturn, by a Quint cy'd Square,  
Do's madam Venus's happiness impair.

The Moon old Chronos and Hermes does meet,  
Which fill our Streets with snow and flabby feet.

# December 1674.

Whilst Hoary Hyems now more rigid grows,  
Bound up with Frosts, & furr'd with Hails & Snows.  
Sol joyns with Stilbon, Mars and Venus square,  
Whole Rival Beams produce a troubled Air.  
But last of all kind Aspects do appear,  
And merrily conclude th' Expiring Year.

### Judicium Astrologicum.

In this Scheme of the Suns Ingress & to Aries, we have a fixed Sign ascending, which according to Haly and the ancient Astrologers is therefore thought sufficient for the judgement of the whole year; And since it is become so customary by all Annual Writers, to venture their credits in their Annual Conjectures, I shall take the boldness also to cast in my Mite, and endeavour to interpret, at least give my sense, what the Starres may portend to us Mortals; this present Revolution, but will

leave a more curious scrutiny of the matter, so those Hero's that have many years acted their Parts upon the Astrological stage with great Applause. But not to detain you too long with the Prologue, I come immediately to the matter it self; In order thereto to be pleased to understand, That in the New Moon Preventional Leo Ascended the H roseope 26 and Sol the Lord thereof was in Trine to Jupiter, who was then posited in the North-Angle.---

In the full Moon Postventional, viz 10 deg thereof did Arise, and Jupiter in the eleventh R in Scorpio---

But in this our vernal Ingress we have a fixed sign Aquarius ascending, as before hinted, and Jupiter in Trine to Venus in the Asce daunt, a very favourable and benevolent Aspect, which promise favour to the people in general from their Superiours and Magistrates, under whose subjection they live. The Scheme is self in general seems not to threaten so Grand Catastrophe's as many are too apt to fear;--- Indeed Saturn in the second may keep us poor; but it will continue but for a season: he will not many years keep his Court in Aries English sign, therefore let us not despond but bear up against our greatest adversaries.

The Moon in the seventh casting to a Sextile of Jupiter upon the Cusp of the Ninth, promises well to our Sea-affairs; Our Merchants may expect prosperous returns, and 'tis to be hoped that there will be a better understanding of one another in Point of Religion, and that animosities may cease amongst us.

A great Probability there is also that strong Ende

Coelsen 1674.

wors will be used for the Composure of the present difference between us and our Neighbor-Nation, that so there may be no more effusion of blood on either side, from which Good Lord deliver us. This Judgment is confirmed by the Position of the Sun in the Ascendant, free from affliction, and in no bad Aspect to Saturn or Jupiter, --- Nay, it seems to intimate a willingness in our adversaries to comply and put an End to the present difference, without which they may expect no lesse then total ruine and subversion: To conclude, I judge the year to be moderately seasonable, and no such danger of scarcity to ensue, as many are apt to suggest. Let us therefore endeavour an amendment and reformation in our selves, and that may be a means to divers any further Judgment that now seem impending; and thus I end my Judgment upon the present Figure of the World, which will doubtlesse one day also have an end, -----  
And then

Those that were laden with proud Marble Tombs,  
Those that were swallowd down wilde Monsters wombs,  
Those that the Sea hath drown'd, those that the flaes  
Of Ruddy flames have burned all to ashes;  
Awaked all shall Rise, and all Revest  
The flesh and bones that they at first possst;  
And some must Justice, some must Mercy wait,  
Some call'd to joy, some into Tormen cast.

Debars as.

Coelsen 1674.

Eclipses this Year 1674.

Five times will the two great Luminaries of Heaven suffer an Eclipse this year, the Sun thrice, and the Moon twice.

The first will be of the Moon, who will be visibly Eclipsed as to us, on Jan. 12. about our 6 of the Clock in the Morning; It will be also conspicuous to the inhabitants of *Germany, France, Spain, Denmark, Finland*, and to such as sail along the Baltick Ocean, unto the most of which places the Moon will set Eclipsed. But the Eclipse will be visible in their Meridian who inhabit *New France, Florida, Cuba, Peru, &c.* and there it will appear an almost total Eclipse, viz. 10 parts of 12 obscured.

The second will be of the Sun Jan. 26 about our 9 of the Clock at night, to such as sail in the western Ocean, and live about the Islands of *Californiæ, &c. Cape of good Hope, &c.* it will appear a great Eclipse, but to us invisible.

The third Eclipse is of the Moon, on July 8. about our 8. of the Clock at night; the Moon to us will rise somewhat Eclipsed: but to the inhabitants of *Moscovia, Lithuania, Poland, Germany, Barbary, Guinea, &c.* she will appear almost totally darkned, 10 digits of 12 will be obscured.

The fourth Eclipse will be of the Sun, on July 23, about our two of the Clock in the morning, and will be seen by such as sail towards *New-Holland*, or about the

Cochon 1674.

the Promontory of the *Cape of good Hope*, and in the Oriental Ocean, to us invisible.

The fifth and last Eclipse will be of the Sun, but very small, not visible to us, nor much visible to any part of the whole world, on *Decemb. 17.* about four five of the Clock in the morning.

The glorious Planet *Venus* is our bright Morning-star, until the 12. day of *April* this year, and from that time becomes our Evening-star, and so continues unto the end of the year.

*Of the four Quarters of the Year.*

The Spring takes his beginning when the Sun toucheth the first scruple of *Aries*, which happens this year on the 10. day of *March*, half an houre past four of the Clock in the morning, who by his Appearance makes the earth to smile, coming to revive what frowning *Winter* had almost destroyed.

This season is by nature hot and moist, the most temperate time of the year, a very convenient time to take Physick, to unburthen Nature of all such humors as do oppress her, either by Purging, Bleeding, or otherwise, as occasion may require; this Quarter the body of man is incident, more then at other times, to Feavers, Jaundies, Imposthumes, Swellings, Scurvies, Boils, Itch, Pushe, Pox, bleeding at Nose, spotted Feaver, and such other diseases, occasioned by the Quantity or Quality of the blood.

*The Summer Quarter.*

Takes his beginning when the Sun toucheth the first  
 Scruple of the Tropical sign *Cancer*, causing longest  
 days and shortest nights to all on this side the *Aequa-*  
*tor*, which this year happens on the 11. day of *June*,  
 at seven of the Clock in the morning. This season  
 by nature is hot and dry, fatts Cattel, and brings all  
 things to ripeness, increasing, the rich mans store,  
 and maketh the earth fat with the bodies of men, wo-  
 men and children, by reason of those so many diseases  
 now incident to Nature, *Burning Feavers*, *Phren-*  
*sies*, *Inflammations*, *Impesthumations*, *Vlcerations* of  
 the *Lungs* and *Bladder*, Heat in the *Reins*, the *Gonor-*  
*rhea*, *Black Passion*, and such diseases as proceed from  
*Choler*.

*The Autumn Quarter.*

Takes his beginning when the Sun toucheh the first  
 Scruple of the Sign *Libra*, which happens this year  
*September* 19. 35 min. past 10 at night.

This Quarter season is very variable and uncon-  
 stant, causing warm days but cold nights, and  
 the body of man as incident to bad diseases, as  
 at any time in the year, *Quartane Agues*, *Fee-*  
*vers*, *Apoplexies*, *Fistulaes*, *Fluxes*, *Hemorrhoids*,  
*Dysenteries*, Pain of the Back, Side and Stomack,

Uxellon 1674.

occasioned by VVind, Pains in the Reins, Stone, Suppression, Palsies, Convulsions, Madnes and Distraction, occasioned by Melancholy, Obstructions of the Spleen, and such diseases thereby occasioned.

*The Winter Quarter.*

Takes his beginning when the Sun toucheth the first Scruple of the Tropick of *Capricorn*, causing shortest days and longest nights to all on this side the *Aequator*, and is a great Antagonist to the fruitful Harvest, and disgrace to Summer, which happens this year on the 11. day of *December*, 10 minutes past 10 of the clock in the Morning.

This Season is by Nature cold and moist, no great pleasure to the weary Traveller, and causeth many Obstructions in the bodies of old People and others, who are incident to receive Colds, Cough, Rheums, Palsies, Poxies, Cramps, Convulsions, Vertigoes, Epilepsies, Apoplexies, Cholicks, Harshness, Fluxes, Pain in the Teeth, Noise in the Ears, Agues of all sorts.

*The*

Coelfon 1674.

*The Use of the Succeeding Table.*

And is very useful for all such as buy or sell by retail, or otherwise deal by the gross Hundred, as for brevity-sake,

AN EXAMPLE.

If a Commodity be sold for 7 pence the pound, seek 7 pence in the first Column, and against it toward the right hand you shall have 3 pounds 5 shillings 4 pence; so if the pound be 15 pence half-penny on the right hand Column, you shall have 7 pounds 4 shillings 8 pence; so if a Commodity cost 9 pounds 16 shillings the hundred, seek 9 pounds 16 shillings in the right hand Column, and in the left thereof you shall finde 21 pence; or if it cost 5 pounds 16 shillings and 8 pence, there will answer to the left thereof 12 pence half-penny; And so of any other price, where you have 1, 2 and 3 in the column of farthings, it is for 1, 2 and 3 farthings.

A very Necessary Table whereby knowing the price of the Hundred weight, you may readily know the price of the pound, and the contrary, according to 112 pound to the Hundred.

Coelfon 1674.

Courteous Reader,

**S**ince my last Almanack, wherein I gave you an Account of my being removed from St. Katherins in the Still-yard upon Great Tower-hill, I have found out some abuse from a Person very near adjacent to my old habitation at St. Katherins, who damnifies both me and my Patient; such as when they enquire for me, and by him informed, that I am removed he knows not where it tells them some obscure place: Of the true place my Almanack now gives you an Account. I present I have nothing else to recommend to you, but a certain and speedy way of curing Deafness, although long continuance, if curable; and my excellent Powder which kills all sorts of VVormes in young or old, and my Rare Balsam which cures many Distempers internal and external, with Printed Notes as to its use and vertue; and my incomparable Scorbutick Pill, which perfectly cures the Scurvey and any other disease complicated therewith: it also cures any Venereal Distemper, not too far Radicated: it cures also all Pains in the Head, Back, Stomack and Sides; in short, they purge all putrified humors, and preserve the body from corruption, so long as Nature can be preserved in that quality. I have likewise a very pure water, which will continue and gain, if lost, a very good Complexion.

From my house at the Royal Oak in the Still-yard upon Great Tower-Hill. July 20. 1673.
